

**Y**ears and years I went again and again to internet and found lots of sources about chameleons. And always, I ended up upset how some people dare to present such wrong information...

When debated this with colleagues and friends, repeatedly, they said: „Do your site and make it the ultimate reliable source of right and up-to date info...“ Well, I resisted many years...

And now, I take the liberty to show you a beginning of the journey:

## CHAMELEONS.INFO

This site is made for the good of chameleonkind and mankind. It is dedicated to chameleons to secure their their existence in the wild and to provide information and inspiration, fostering their wellness and thriving in captivity...

As the existence of chameleons as a family is directly and indirectly tied with trees, it is important to care for trees as well and this way to care for the whole planet.

### The site has a simple, logical structure

#### CHAMELEON PROFILES

Depicting and describing the bionomy and husbandry of the most common chameleons in captivity:

- **CHAMAELEO CALYPTRATUS**
- **TRIOCEROS JACKSONII**
- **FURCIFER PARDALIS**

with comprehensive and correct care sheets.

#### CHAMELEON VARIA

A series of texts about:

- **CHAMELEONOLOGY**  
natural history of chameleons
- **CHAMELEOCULTURE**  
captive husbandry
- **CHAMELEONONOTA**  
chameleons-related matters

with emphasis to modern up-to-date research and real practical experience.
