

# CHAMAELEO CALYPTRATUS

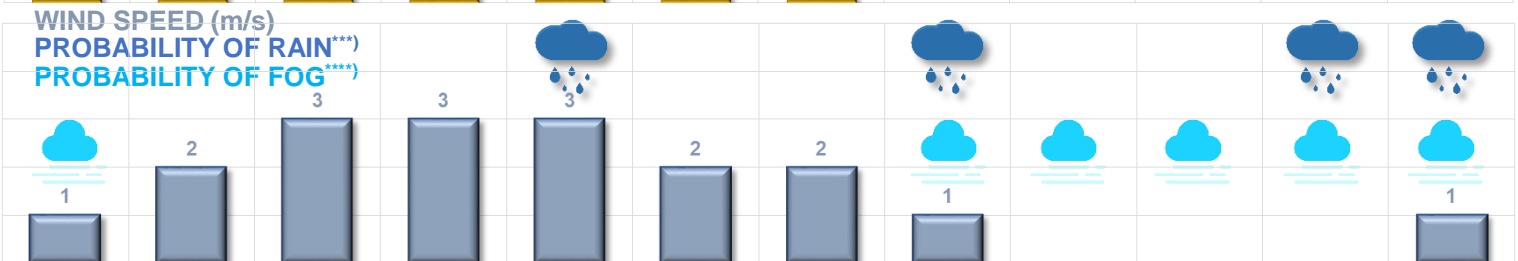

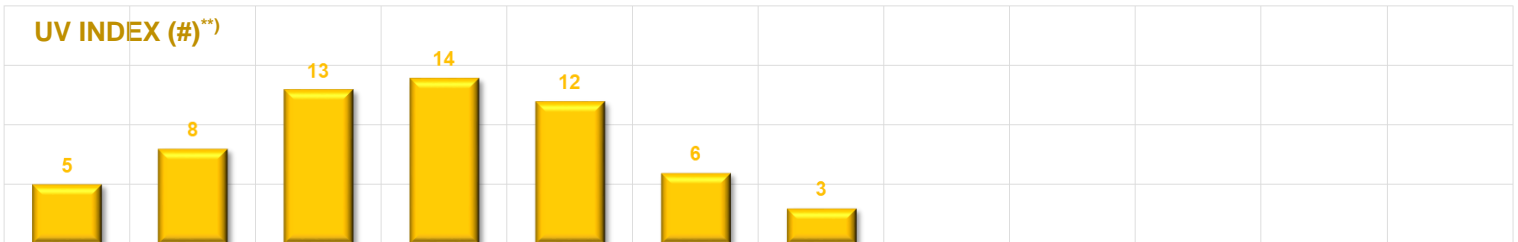

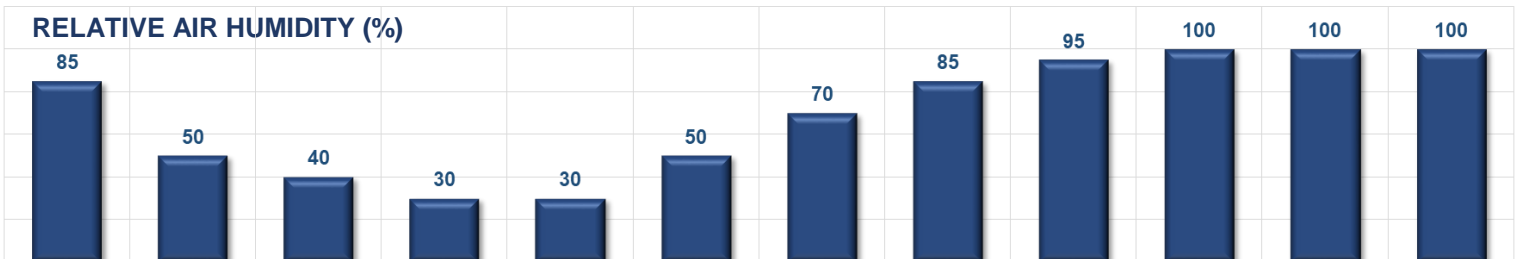

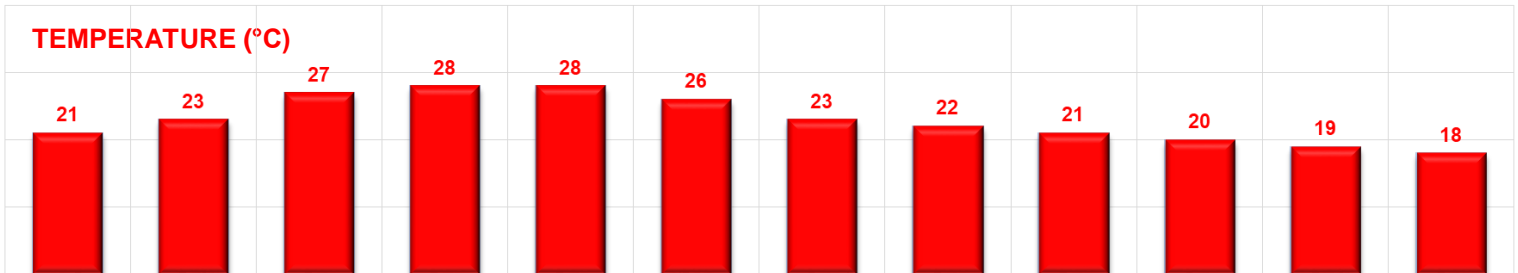

## DAILY WILD LIFE HISTORY: RAINY SEASON

Waiting for sun	Basking*)	Hiding, hunting, socializing	Basking*)	Waiting for night	Sleeping
-----------------	-----------	------------------------------	-----------	-------------------	----------

### Daily Activities / Timing (hours)

6-8	8-10	10-12	12-14	14-16	16-18	18-20	20-22	22-24	0-2	2-4	4-6
-----	------	-------	-------	-------	-------	-------	-------	-------	-----	-----	-----

\* 15 minutes only  
 \*\* Dependent on cloud cover (reduced to 0-4), the real exposure depends on the presence/absence of blocking environmental elements (in bush 0,5-2)  
 \*\*\* It is probable that it will rain in this period, but it is very volatile  
 \*\*\*\* It is probable that the dew point will be close to the temperature and that low clouds/fog will form
