

# CHAMAELEO CALYPTRATUS

## DAILY WILD LIFE HISTORY: DRY SEASON

Hibernating

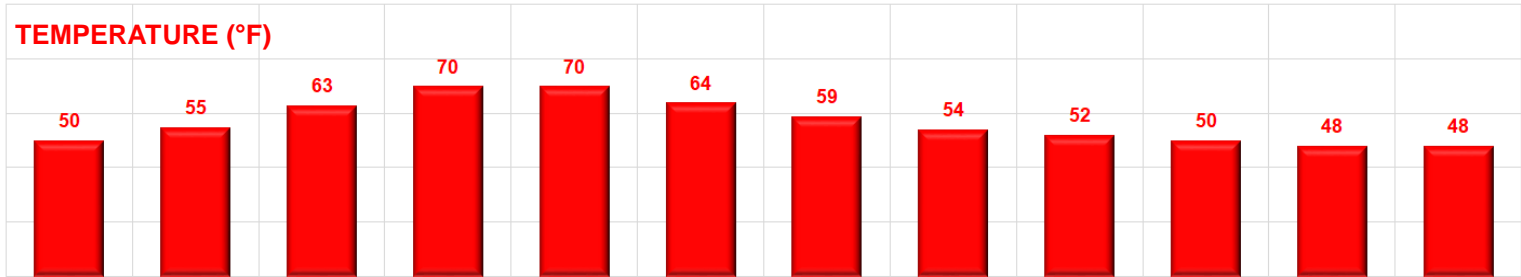

Sleeping

### Daily Activities / Timing (hours)

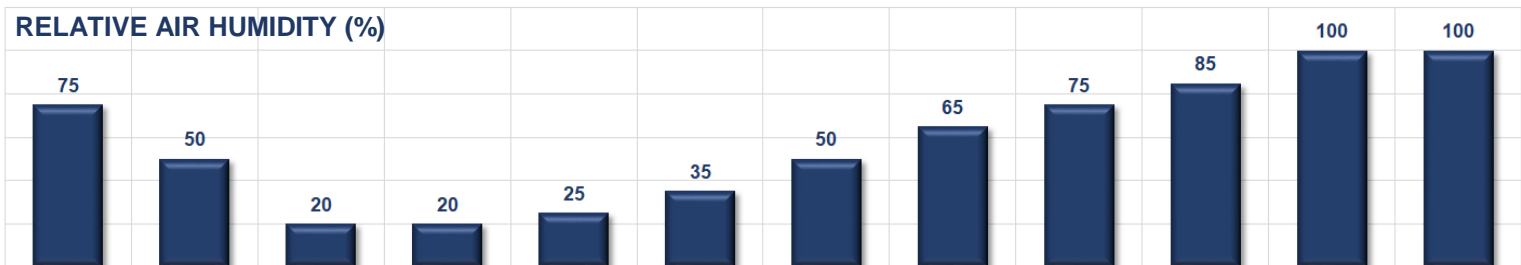

6-8	8-10	10-12	12-14	14-16	16-18	18-20	20-22	22-24	0-2	2-4	4-6
-----	------	-------	-------	-------	-------	-------	-------	-------	-----	-----	-----

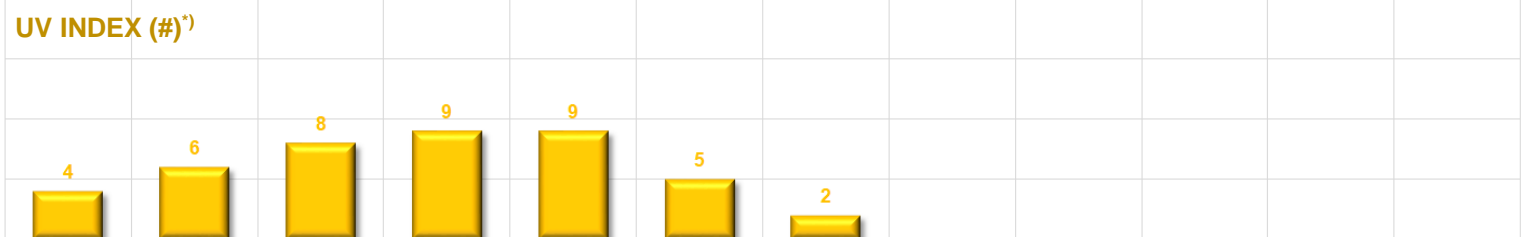

### TEMPERATURE (°F)

### RELATIVE AIR HUMIDITY (%)

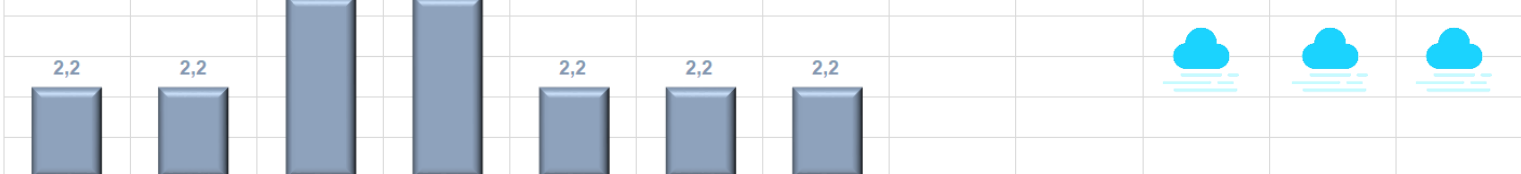

### UV INDEX (#)\*\*

### WIND SPEED (mph)

### PROBABILITY OF RAIN\*\*

### PROBABILITY OF FOG\*\*\*

\* Dependent on cloud cover (reduced to 0-4), the real exposure depends on the presence/absence of blocking environmental elements (in bush 0,5-2)

\*\* It is probable that it will rain in this period, but it is very volatile

\*\*\* It is probable that the dew point will be close to the temperature and that low clouds/fog will form
